

ScanSnap *SV600*

A New Perspective on Scanning

shaping tomorrow with you

Redefining what a document scanner can do!

Overhead scanning made simple

Scan newspapers, magazines or books directly without cutting or damaging them.

Preserve delicate documents or books

Some things can't be scanned through a feeder so ScanSnap SV600 operates by taking an elevated view altogether.

Scan business cards to large A3 size (double-letter) documents

ScanSnap SV600 breaks free from typical flatbed limitations by scanning content larger than just letter size. Simply position the document on the A3 scan mat and press scan.

Save time, save effort

Make it an easy job by scanning not only books or magazines but all types of content restrained in binders, spirals, folders, or clear sleeves... just flip the page and scan.

VI Technologies (Versatile Imaging)

Combining high quality CCD optics and advanced LED illumination, ScanSnap SV600 uses advanced capture technologies to maximize field of depth and minimize unevenness page after page.

Smooth operation in overhead scanning

ScanSnap SV600 is enhanced with new customized features while continuing the ScanSnap concept: Simple, Fast and Compact.

Quick Menu saves time!

The Quick Menu pops up after scanning to allow users a fast and productive way to store, share or transform their scanned data either on the computer or into a favorite cloud service like Evernote or Dropbox.

Performance matters.

With the touch of the power button, ScanSnap SV600 is ready to scan in just 3 seconds! And with each press of the scan button, a large A3 dimension scan area is captured in less than 3 seconds. Combined with intelligent image correction, great results are just a button push away.

Automatically crop several documents at once with "Multiple Document Detection"

With an advanced cropping and orientation technology built-in, ScanSnap SV600 can scan several business cards, photos, newspaper clippings and other documents at one time.

Space-conscious design

Breaking the bounds of typical flatbed scanning, ScanSnap SV600 is easy on space as well as effort.

Easily create your own digital books

ScanSnap SV600 is your ultimate partner to scan books or magazines efficiently. With “*Rack2-Filer Smart with Magic Desktop*” software, you can scan, organize and create your own digital books.

Step 1: Scan with one button!

Place the book on the mat and press the scan button.

Page Turning Detection – SV600 detects when a page is turned and automatically begins scanning.

Timed Mode – Set a fixed time interval and SV600 scans in real time with you.

Step 2: Auto image correction

Auto Image Correction – Automatically crops, de-skews and sets the orientation of multiple sheets placed on the mat.

Auto Book Correction - Automatically flattens and corrects the curve distortion of books and magazines.

Flattens and corrects curve distortion.

Point retouch function
Fingers captured during scanning can be removed.

Step 3: Organizing and Viewing

With the included ScanSnap Organizer, CardMinder and Rack2-Filer Smart software, keeping scanned content organized and accessible is a Snap!

*1 Optical resolution differs due to different scanning angle on the same document.
 *2 Scanning speed may vary due to the system environment used.
 *3 Switch between "Better mode" and "Best mode" depends on the length of the document. A4 (portrait): 200 dpi, A6 size or below: 300 dpi
 *4 Time between actual start of scanning (scanning pad) and finish scanning.
 *5 For documents of thickness over 5 mm, the maximum document size is 400 x 300 mm.
 *6 When performing continuous scanning, time is needed for the scanning head to return to its original position.
 *7 Compatible with USB3.0 port but connection will run as USB2.0 speed.
 *8 Automatically correct distortion caused by the curve of an opened book or magazine.
 *9 Digitize multiple documents by automatically cropping several documents in one scan.
 *10 The software is available to be downloaded from ScanSnap website.
