Designed with the entire scanning process in mind, the Fujitsu fi-6800 includes a wide range of features specifically created to enhance productivity and maximize efficiency.

A pleasant user experience

Devices that are easy to use and offer users a comfortable experience leads to more and better quality work. The fi-6800 offers many features which allow scan operators to easily configure settings based on their individual preferences such as language, alarm sound/volume and others directly from the front operator panel.

- Intuitive LCD operator panel
 - Multilanguage, Alarm Sound, Volume, Contrast and more
- Space-saving design and quiet operation for office environments
- Independently adjustable side input guides

Scanning performance

The fi-6800 can maintain rated speeds at up to 300 dpi to increase reading accuracy for OCR or Bar Code applications where more dots per inch is preferable. Additionally, commonly used advanced PaperStream IP features such as automatic orientation and intelligent blank page deletion can be utilized to increase automation without a sacrifice in scanning speed.

- 130 ppm/260 ipm in monochrome or color up to 300 dpi (landscape)
- Rate-speed scanning with PaperStream IP Image Cleanup (TWAIN & ISIS)
- Automatic intelligent image correction for decreased document preparation
 - Auto orientation, auto color detection, intelligent blank page detection, background smoothing
- Document Protection to prevent damage to documents
- Excellent paper feeding of mixed documents of various sizes, shapes and colors

Batch scanning efficiency

In addition to fast scanning speeds, the fi-6800 includes many scanning tools to improve the batch scanning process. The fi-6800 even provides efficiency after documents have been scanned with an Imprinter option to print a physical string on documents and an Active Stacker feature which controls paper speed exiting the scanner to keep documents neat and orderly.

- Patch Code and Barcode job separation with flexible file naming schema
- Batch counter and Document Counting on front operator panel
- Active Stacker keeps documents neat and orderly in the exit tray

Fleet Management.

Scanner Central Admin provides IT departments an efficient way to manage medium to large scanner deployments. With remotely accessible fleet information, IT departments can now allocate resources effectively based on scan volume, consumable wear, depreciation schedules and maintenance expiration.
