

A woman with long brown hair, wearing a grey long-sleeved shirt, is sitting at a white table. She is looking down at a black Kodak scanner. The scanner is a flatbed model with a control panel on the right side. Several photographs are scattered on the table around the scanner, including a dog, a couple, and a child. To the right of the scanner is a black box filled with more photographs. In the background, a large stack of photographs is visible, and a yellow diagonal line runs across the upper left portion of the image.

Volume photo scanning made fast and easy for great profit potential

Say goodbye to the days of slow flatbed scanning! Scanning pictures and other memorabilia is now fast and easy – with great profit potential – thanks to the **Kodak** Picture Saver Scanning Systems PS50 and PS80. Just think – while it used to take one to two minutes to scan a single photo on a flatbed, you can now scan up to 85 photos in just one minute! And the image quality and automatic enhancements are simply dazzling, thanks to easy-to-use, intuitive **Kodak** Picture Saver Scanning Software.

Choose the system that best fits YOUR business model

Based on volume needs, one of these behind-the-counter photo scanning systems can improve your internal processes and/or add a new revenue stream to your business. Along with faster image capture, the PS80 Scanner also adds more features, such as additional output formats, order deletion, and more valuable new functions.

- Print images to have hard copies to save and share
- Share images on photo sharing sites, via e-mail, or make CDs/DVDs to mail to friends and family
- Make new albums and use images on social media sites such as **Facebook**
- Create an archive and backups of valuable photos and documents

Easy-yet-powerful software

Kodak Picture Saver Scanning Software features a highly intuitive, easy-to-use, icon-based interface and offers a variety of automatic and manual image improvements. It's a photo scanner and document scanner in one, so it can also be used to scan documents for your business and empower you to do more with the information you capture.

- **Kodak Perfect Touch** Technology automatically delivers fewer dark shadows, more vibrant colors and richer detail on photo scans
- Built-in image processing enhances color/brightness/contrast, removes red eye, and automatically rotates and straightens images
- Smart Touch functionality lets you assign one-button shortcuts to common scanning tasks to save time and simplify operations
- Change settings mid-job for greater control over how items are scanned and to enhance workflow

Streamline digital conversion of entire photo albums

The **Kodak** Photo Selector Accessory option permits users to extract individual images from a composite image (such as a multi-picture photo album page) and have each image saved as a separate digital file after scanning. Now fragile album pages are protected, and there's no need to risk damage to photos by taking apart a complete album, removing pictures that may have been in place for years, or even lifting the page protector. The Photo Selector Accessory option requires purchase of a **Kodak** Legal Size Flatbed Accessory or **Kodak** A3 Size Flatbed Accessory, available at a very affordable additional cost.
