So what can you do with this information?

NewWave VARs tell us that this feature is a major value when they need to go back and track equipment sales for possible "tech refresh" scenarios. For example, you can search for all 2000i sales under Rimage, and armed with that information, contact those customers to upgrade to 5100 or 5300 series.

How do you do this? First, you can save the report to an Excel spreadsheet by clicking on the blue **Click Here** link. Once in Excel, you can sort by any of the column headings, parse out only the product number you are looking for, and use those results as your target list.

Another excellent use of information from Purchase History is the ability to view invoices for particular products. Simply click on the **Invoice Number** from your results list.

This view shows you "Ship To" name, Invoice #, invoice date, and even the serial numbers of the products that were shipped, so you can really track your business through our site. The tracking number is also included, in case you are wondering who actually signed for the packages, as your proof of delivery.

Another use of the Purchase History features is to track Rebates. You'll notice the second to last column on the right shows you Rebate amounts. You can use this information to track Rebates, making sure you are collecting that money. Many of the rebates you see here are Instant Rebates, and will be deducted from your total at the time of purchase from NewWave.

We know that there are probably many more ways in which to use the Purchase History feature. We hope you've found these ideas to be helpful! If you have ideas of your own that you would like to share, please contact our E-Commerce Support Team at 800-536-5222.
