# ABBYY® Screenshot Reader™

ABBYY Screenshot Reader is an easy-to-use tool for capturing anything on your screen – instantly! Just point-and-click and you can create snapshots from Web sites, documents, images, error messages, file menus, flash demos – if it's on your screen, you can capture it. You can then turn these screenshots into editable Microsoft® Word and Excel® documents, files or email attachments. Powered with data transformation with unsurpassed accuracy, Screenshot Reader allows you to take a snapshot of anything on your screen, save it, convert it or email it with a simple click of your mouse!

Key Features and Benefits

- **Capture anything on screen.** Screenshot Reader lets you capture any information visible on your screen. Turn any onscreen text or image into an editable document or image file – quickly and easily.

- **Easy-to-use interface.** Screenshot Reader's intuitive interface means no learning curve. Just select the area or active window you want to capture and what output format you want – Screenshot Reader does the rest.

- **Superior recognition accuracy.** Powered by award-winning ABBYY OCR technology, Screenshot Reader transforms screen information into an editable format with unsurpassed accuracy.

- **Flexible capture options.** You have the flexibility to capture the whole screen, just a specific screen area or an active window. The Timed Screen option lets you take a delayed screenshot – convenient for capturing fleeting flash images.

- **Convert results to Microsoft Office® applications.** Instantly convert captured images and send the results to Microsoft Word, Excel and Outlook® with a single mouse click.

- **Email screenshots**. Easily convert captured images as an email attachment to share with friends or colleagues.

- **Multiple saving formats.** Save captured images in common image formats, such as JPEG, BMP and PNG, as well as RTF, DOC, TXT and XLS formats.

- **Reads 179 languages with automatic language section.** Screenshot Reader automatically recognizes multilingual text on the screen.
