OPENFORMS™
Automated Forms Processing

Less Work. More Flow.

Now tall stacks of forms can virtually process themselves

OpenForms360 is an advanced forms processing solution that enables you to automatically process structured and semi-structured business forms and documents using your scanner, copier, or multi-function peripherals (MFP)

The image displays a stack of forms on the left. In the center is a 'Student Survey' form with various fields and checkboxes. On the right is an 'Invoice' form from Notable Solutions, Inc. The invoice includes the following details:

Notable Solutions, Inc.
 6 Montgomery Village Ave.
 STE 400
 Gaithersburg, MD 20878
 USA

Invoice

Streamline Your Workflow

With OpenForms360, tasks are completed more quickly, staff is more productive (and happier) and departments run smoother so that your business can drive down costs.

There's no more cumbersome, time-consuming and error-prone manual data extraction and data entry by busy and overloaded staff members. Using OpenForms360, you simply specify the data you need to capture, extract it, and send it on for further processing – all automatically and accurately.

What Sets OpenForms360 Apart?

OpenForms360 differs from other automated forms processing solutions in two key ways:

- For one, OpenForms360, built on the AUTOSTORE platform, allows you to capture forms and documents from virtually any source, including scanners, copiers, MFPs, network folders and FTP sites, even email.
- Secondly, OpenForms360 enables you to easily establish business rules to route and process data and business information exactly as you wish.

Key Benefits:

- Fully automate paper forms processing (including structured and semi-structured forms)
- Speed up processing and response times
- Improve productivity by eliminating time-consuming manual data extraction and data entry
- Increase accuracy with automated processing and enhanced forms recognition tools
- Reduce operating costs through faster processing and redeployment of staff to other business tasks
- Achieve rapid ROI (in less than a year)

Key Solution Features

- Automatically extracts, validates and routes data from paper forms and documents using a scanner, copier, or MFP
- processes structured and semi-structured forms
- Recognizes hand writing, barcode, checkmark and machine print
- Performs data verification with intuitive tools
- Automatically sends error notification upon completion of tasks
- Let's you set up and manage workflows with a user-friendly interface

OpenForms360 is a dynamic solution for accurate and timely processing of invoices- a core, and often time-consuming- task for every business.

A Smart Solution For Any Industry

OpenForms360 is a smart forms processing solution for virtually any business, especially those in information-intensive industries, including:

Banking – loan, mortgage and account applications

Education – student applications, exams and transcripts

Government – tax forms, voter registrations and more

Healthcare – patient records, EOBs, HCFA, UB

Hospitality – guest registrations

Insurance – claims forms

Retail – timecards and safety observation cards

A Smart and Highly Cost-Effective IT Investment.

OpenForms360 is not only an uncommonly robust forms processing solution – it also offers a much smaller impact on IT (as compared to other solutions) from both a time and cost standpoint.

OpenForms360 offers:

- Simple installation and fast deployment
- Efficiency and accuracy (approximately 10 times faster than manual entry and up to 99.5% accurate)
- Easy integration with any digital copier or network Scanners and MFPs
- Flexibility to meet the unique requirements of diverse businesses and industries
- Fully customizable
- Rapid ROI
- Low total cost of ownership

The advanced features of OpenForms360:

- Automated document classifications
- Improved data quality through dual OCR engine
- Local and remote data validation
- Ability to dynamically train the system for improved form layout recognition (see below)
- Scalability for large volume and load distribution

Dynamic Forms Training:

Using Dynamic Forms Training, once you define the data fields you want captured, OpenForms360 automatically scans the entire document for any combination or variation and locates the data you have requested, and will remember the location of the data next time a similar form is encountered.
