FUJITSU

Get to know PaperStream Capture Pro.

- **High quality.** PaperStream IP image cleanup can be applied during the scan, during import, or even after the scan to ensure crystal-clear images, improved data extraction, and efficient indexing.
- **Capture via scan or import.** Create new digital documents with your Fujitsu fi-series scanners, and have the flexibility to import files from other scanners and MFPs.*
- **Fast configuration and setup.** Pre-defined templates make common tasks a breeze. An intuitive, user-friendly interface means no-hassle adjustments on the fly. Reduces setup and training time.
- **Easy export options.** Support for the most common release formats is built right in, like JPG and searchable PDF. Connectors are available for release to third-party document management systems.
- **No-nonsense pricing.** Licensing is per station, and there's no per-page cost or limit on pages scanned.
- **Flexible.** Can stand alone or as part of a multi-station solution.* Operate certain phases of the document capture process at different locations.* Works with any Fujitsu fi-series scanner.

*Additional license required

All these benefits, plus the assurance of Fujitsu's legendary quality and 24/7 customer support.
