

PaperStream Capture Pro v2.0

Simple and Powerful Front-End Capture Software

Brochure

PaperStream Capture Pro is a simple, yet powerful front-end capture software that efficiently processes documents by offering seamless, high-quality front-end capture, image enhancement and organized, indexed and extracted data for release. PaperStream Capture Pro can help organizations optimize important data, improve business efficiencies and increase productivity.

Streamline Processes

High-Quality Capture

Using PaperStream Capture Pro, organizations can quickly scan paper batches, import digital documents*, or easily scan ad-hoc for one-off documents. The Import feature provides a way to bring digital documents into the capture workflow from a multi-function device, a third-party scanner or a back-file of existing images.

Best-In-Class Image Processing

PaperStream Capture Pro utilizes the Fujitsu industry recognized image cleanup tool, PaperStream IP. With PaperStream IP, the scanned documents will be quickly and radically cleaned up for more accurate processing downstream. Unique to PaperStream Capture Pro, the image processing function can be performed during scan, during import*, or after scan.

Document Separation

Increase operational efficiency while reducing manual errors using PaperStream Capture Pro's page separation methods including:

- Basic Zonal OCR
- Fixed Page
- Blank Page
- Barcode
- Patch Code

Improve Efficiencies

Reduce Costs

Key Differentiators:

PaperStream Capture Pro offers many enhancements over basic capture software. These enhancements include:

1. Captures paper batches, imports from file or scan ad hoc
2. Document separation using Zonal OCR
3. PaperStream IP is applied to images during scanning, during import* and after scan
4. Extracts and indexes using more advanced methods including OCR, Key From Image, Database Lookup and System Data
5. A separate data QC / Index module is available**

Data Extraction

Rapidly capture critical data, validate and confirm data using various extraction techniques and fields including:

- Manual – Key From Image (KFI)
- Zonal OCR - Machine Print (20 zones)
- Rubberband OCR for ad-hoc
- Barcodes (up to 20)

Document and Data Validation

To quickly verify accuracy, a separate QC/ Index license is available and performs validation through multiple methods:

- Regular Expression Validation
- Required Fields
- Read-Only Fields
- Database Lookup
- Character Masking
- Database Lookup
- System Data

Release

Reduce the number of clicks to save files:

- Releases images to TIF, JPEG, PDF, searchable PDF
- Releases data as XML, CSV, TXT, CMIS
- Releases to a folder, network folder, or FTP
- Releases to SharePoint

Licenses and Purchasing

PaperStream Capture Pro is cost-effective and easy to purchase:

- No cost per click or by volume
- Save 25% - Purchase the [Deluxe Bundle](#) which includes (1) PaperStream Capture Pro Workgroup License plus (1) Fujitsu fi-7160 Document Scanner
- Separate QC / Index and Import licenses are available to provide flexibility with distributed scanning

Supported Languages

- English, Spanish, and French

Data Collection

- Detailed data collecting for monitoring performance for scan stations, indexing usage, and batch releases.
- Enables employees and managers to balance workloads, measure performance, and be pro-active on scanner maintenanc

Additional NEW Features (v2.0):

- All-in-One View - shows scanned documents, with the ability to re-scan or perform After Scan Correction, and indexing all on one screen. No need to toggle back and forth between screens.

- Save time while reducing errors
- Reduce costs
- Improve Efficiencies
- Dedicated U.S. based customer support
