BENEFITS OF SCANNERS

Scanners can handle from 1,000 to 50,000+ pages per day and offer advanced document handling, as well as advanced image processing!

The document feeder of a Multi-function Copier / Printer (MFP) is solely designed to scan once and print many, not continuously scan!

Image 1 scanned with **no image enhancements**.

*Supported on select models only.

QUALIFYING QUESTIONS

1. Are you currently using an MFP for scanning and document management?

2. Does your MFP experience frequent jamming and service?

3. Are you experiencing delays in copy or print operation due to the scanner being used?

4. Are you scanning more than 1,000 pages per day?

5. Do you scan documents which have hole punches in them?

6. Are you spending valuable time properly orienting your document originals before scanning?

7. Are you spending valuable time manually cropping your scanned documents after they are scanned?

8. Do you need to scan documents other than plain paper like embossed ID cards (insurance cards / driver's licenses), long paper and passports?

9. Is your MFP capable of scanning both sides of your documents in a single pass?

10. Are you scanning mixed-sized originals?

11. Do you require bates stamping on your scanned documents for versioning?

12. Are you concerned about your MFP retaining your scanning images into its memory?

If you answered "yes" to any of the questions above, then Panasonic recommends the addition of a dedicated scanner to your current document management solution.
