## KV-S847M100 HIGH VOLUME PRODUCTION CLASS NETWORK SCANNER SOLUTION

Panasonic's newest M100 series network scanning system combines the advanced processing power of an Intel Core™ i5 tablet with the high speed and high volume throughput of the KV-S8147 production scanner, providing the industries fastest fully-connected network document management and imaging solution. The KV-S847M100 High Volume Production Class Network Scanner Solution includes high-speed Ethernet and wireless network connectivity and eliminates the need for manual scanning and data entry with the ability to scan to shared folders, email or fax at the touch of a button. Enhanced features include duplex and batch scanning, ability to scan long-form documents, local user management and remote administration.

Now businesses can simplify their document management processes through network scanning automation, which will reduce errors and increase efficiency.
