Upland's FileBound Named Finalist for Stratus SaaS of the Year Award

Business Intelligence Group recognizes Upland's document and workflow automation software as an innovative cloud offering

(Lincoln, NE) July 22, 2014– Upland Software, Inc., a leader in cloud-based Enterprise Work Management applications, announced today that its FileBound document and workflow automation software has been named a Stratus Award Finalist. Sponsored by the Business Intelligence Group, this industry awards competition recognizes companies innovating in the Cloud and providing state-of-the-art offerings that are truly differentiated in the market.

"Business leaders are asking for solutions that reduce their reliance on IT and allow them to respond quickly to change," stated Sean Nathaniel, General Manager of FileBound and Senior Vice President of Technology for Upland Software. "FileBound is meeting this need today by delivering rich document and workflow capability, mobile access, advanced analytic dashboards and more via the cloud."

FileBound was evaluated by an elite panel of judges in the category of Software as a Service (SaaS) of the Year. The only end-to-end enterprise content management (ECM) application among the winners and finalists, FileBound demonstrates its leadership in cloud-based information management and governance.

"We are proud to reward Upland Software in the 2014 Stratus Awards," said Dawn Fordyce, managing director of the Business Intelligence Group. "FileBound is clearly leading the market in delivering real value to their end customers by leveraging the cloud."
