

RESELLER BULLETIN

Subject: New Energy Star 3.0 Certification

Bulletin Type: Product Marketing Service

Bulletin Number: Document Imaging-2019-PB-127

Date: August 7, 2019

Product: Document Scanners

Panasonic would like to announce it has achieved the latest Energy Star 3.0 certification for all KV-S / KV-N series document scanners, currently in production.

To ensure all current models adhere to the latest Energy Star 3.0 specifications, a firmware update for many of our current models is required.

The primary change in firmware to meet the latest Energy Star certification was the reduction of the maximum wait time for our scanners to enter sleep mode. The maximum wait time for all Panasonic scanners to enter sleep mode was changed to 120 minutes.

This new firmware update will be added into production to meet Energy Start 3.0 compliance. The table below has been provided to show the latest firmware version that will be applied to current production. For models not listed, a firmware upgrade is not required since it already meets the latest Energy Star 3.0 specifications.

| Model(s) | Version | Production Month |
|---------------------------------|---------|------------------|
| KV-S1015C | 1.30 | September 2019 |
| KV-S1026C-MKII | 1.10 | September 2019 |
| KV-S1037X | 1.40 | August 2019 |
| KV-S1027C-MKII \ KV-S1057C-MKII | 1.40 | August 2019 |
| KV-N1028X \ KV-N1058X | 1.40 | August 2019 |
| KV-S2087 | 1.10 | September 2019 |
| KV-S7097 | 1.10 | September 2019 |
| KV-S8127 \ KV-S8147 | 1.20 | July 2019 |
