

Jaguar Software Certifies the Panini Vision 1™ Check Scanner

Jaguar Software, a leading developer of check processing software has certified the Panini Vision 1™, the latest check scanning platform from Panini's continuous innovation portfolio. The combination of Jaguar's Remote Deposit software and the Vision 1 offer a compelling remote deposit capture (RDC) solution for the small business market.

Jaguar and Panini have been partners for many years and with the introduction and certification of the Vision 1, Jaguar now has the opportunity to provide customers with the most complete and diverse scanner portfolio for remote deposit capture. "The new Vision 1 with the single drop feed technology is the perfect fit for Jaguar's MirrorImage Teller or Remote Deposit customers and WebCapture, Jaguar's new cloud based remittance software" said Richard Leirer, VP of Sales and Marketing at Jaguar Software.

"We are pleased to partner with Jaguar to provide a new low-volume check capture platform," stated Michael Pratt, Chief Executive Officer at Panini. "The Vision 1 leverages the proven performance and capabilities of the world's most trusted platform in check capture, the Panini Vision X – universally considered the industry benchmark for distributed capture with close to a million installations worldwide".

The Vision 1 is a single drop feed, high value version of Vision X for highly professional and user-friendly small-medium business Remote Deposit Capture or reduced volume Teller Image Capture applications. The Vision 1 is able to read MICR with top accuracy, capture superior quality duplex images (including TrueColor and FastColor) and physically mark items on the rear side via its one-line ink jet printer – effectively positioning it for all circumstances where legislation, compliance requirements, or the Financial Institution's preference imposes the use of rear physical item endorsement – while simplified mechanics and no feeder consumables enable even simpler maintenance and increased cost savings.

About Panini

Founded in Turin, Italy, Panini has enabled clients to capitalize on shifts in the global payments processing market for more than seventy years. Panini has a rich history of technology innovation, and Panini's market leading solutions are based on state-of-the-art research & development and ISO-9001 quality certified production. Panini offers capture solutions that enable customers to fully realize the advantages and efficiencies available with the digital transformation of the paper check, resulting in the world's largest deployed base of check capture systems, now approaching one million devices. Panini's scalable capture solutions digitize checks and payment related documents and transactions to address the complete range of distributed check processing opportunities including teller capture, back-counter capture, remote deposit capture, point-of-sale capture and remittance processing. The company provides solutions on a global basis, and has direct subsidiary operations in the United States covering North America and in Brazil covering Latin American markets.
