Doctors Gain Stimulus Funding and Service Patients More Effectively with Mobility and Affordability

The Plustek SmartOffice Scanners with AutoMED's Hosted Software Solutions help doctors automate their workflows

In the technological era, everyone is using iPads and Smartphones to make their lives easier – including physicians. The medical industry is typically bogged down with paperwork, but now more and more doctors, clinicians, administrators, and assistants are using scanners to bridge to paperless.

Plustek's SmartOffice PS286 Plus and the PS406U scanners are popular models in the medical industry because they are fast, light, mobile and take up very little space. These scanners are able to quickly scan patient registration, medical records, insurance cards and identification cards, which are a very important part of the administrative and clinical process for hospitals and clinics.

For over 11 years AutoMED has delivered software solutions to hospitals and medical clinics. AutoMED works with doctors to make their workday more efficient and effective. Clinicians are often mobile, working between several clinics and need to keep their patient files and information paperless in a single location. AutoMED and Plustek have partnered to provide effective and affordable paperless solutions to medical clinics and physicians.

The American Recovery and Reinvestment Act of 2009 set aside nearly \$20 billion in incentive payments for physicians who adopt electronic health record technology over the next five years. In order to qualify for the incentive monies, physicians must be using certified technology, allowing nearly every physician in America to gain up to \$63,000 in incentives to switch to an electronic environment. Plustek and AutoMED solutions make these recovery monies a reality for physicians. This has sparked incredible interest in going paperless and allowed Plustek and

AutoMED to service this need.

“Clinician doctors often work at several different facilities and have to juggle their time and efforts running between offices,” said Joe Persky, vice president of AutoMED. “Our focus is to provide solutions allowing for improved efficiency and increased productivity; the Plustek scanners keep them mobile and paperless without breaking the bank. These scanners are light and rugged enough to withstand constant transport without failure; powerful enough to upload medical records in seconds; compact enough to fit in even the tightest workspaces and affordable enough to allow clinics of all sizes to benefit.” In fact Mr. Persky says prior to the Plustek option, “the average clinic was paying triple for scanners which were slower, heavier and bulkier.”

ABOUT PLUSTEK’S SMARTOFFICE PS286 PLUS:

The Plustek SmartOffice PS286 Plus workgroup class document scanner is designed with the image quality, paper handling and reliability required by the most demanding business users but at a price point attractive to home and SOHO users. The small size and footprint of the SmartOffice PS286 Plus make it appropriate for office, front desk or portable scanning tasks. With a 50 page automatic document feeder and 1500 page per day duty cycle, this scanner is built to scan documents in any application requiring frequent document and rigid card scanning.

ABOUT PLUSTEK’S SMARTOFFICE PS406U:

The Plustek SmartOffice PS406U departmental class document scanner is designed with the image quality, paper handling and reliability required by the most demanding business users. At a scan speed of 40 pages per minute, the PS406U provides true departmental class performance yet is priced to offer outstanding value. The 100-page automatic document feeder and 4,000 pages per day duty cycle features exemplify why these scanners are built to scan documents in any heavy usage application.

The SmartOffice series from Plustek can be purchased from authorized resellers including AutoMed, DMRs, VARs, and distributors including NewWave Technologies, Ingram Micro and D&H. For more information call (714) 670-7713, e-mail infousa@plustek.com or visit www.plustek.com/usa.
