A solution with check scanners, software and services that allows you to capture a competitive edge

By passing the Check Clearing for the 21st Century Act (Check 21) in 2004, Congress removed barriers to electronic check processing, allowing the possibility of moving money in hours instead of days. Now, with the comprehensive check imaging solution from Kodak, your business or organization can accelerate cash flow and gain real operational efficiencies.

You can now electronically transmit check images and data to the appropriate financial institution. This enables more efficient and accurate processing and settlement. You can also easily archive and retrieve checks. With check imaging from Kodak, you can move money—reliably and securely—at the speed of sight.

High-quality imaging—exactly what you'd expect from Kodak

Money exchange that's based on digital imaging demands exceptional image quality and that's precisely what Kodak is known for. **Kodak** check scanners produce high-quality images of scanned checks that enable accurate processing by the client application, time after time. Plus there's so much more:

- Easy installation and integration with the USB 2.0 interface
- Compact size fits easily into just about any environment

- Magnetically reads MICR data for highly accurate data capture
- Automatic document feeder quickly scans checks and associated documents
- Models with an inkjet printer allow pre-scan imprinting of document control numbers (DCN) or other custom information on the back of the check
- Image formats that meet ANSI X9B image quality standards
- Helps ensure that images are accurate and complete
- Automatically prompts for any required rescans or data entry
- Securely interfaces with **Kodak** t6000 server software
- Can be easily customized
- Can support other manufacturers' capture devices

Software products

Client software for application automation and a lot more

Kodak t6000 client software for transaction applications installs easily and can integrate with your existing PC-based infrastructure. It can be deployed in a wide variety of environments, such as bank teller workstations, remittance operations at utility companies, point-of-sale stations in county and town clerks' offices, department stores, pharmacies and supermarkets—virtually anywhere checks are presented for payment or deposit.

Kodak t6000 client software

- Supports the complete portfolio of **Kodak** scanners
- Automates data entry via recognition technologies and auto-population of fields in the client application
