

Kodak's Document Imaging Honored with Best of FOSE Award at FOSE Conference 2011

KODAK i2800 Scanner recognized in the peripherals category as an outstanding and innovative IT product for government use

ROCHESTER, N.Y., August 31 - Kodak was among the top companies honored with a Best of FOSE award during the July 2011 FOSE Conference and Exposition in Washington, D.C. The KODAK i2800 Scanner, a compact scanner offering numerous user benefits in productivity and efficiency, was named the winner of the Best of FOSE Award in the peripherals category. Each year, Government Computer News (GCN) staffers, consisting of writers, editors, and researchers judge exhibitors for the Best of FOSE Awards that recognize outstanding and innovative IT products best suited for government use.

The government technology industry relies on document imaging tools to effectively maintain both the accuracy and security of data distribution among employees. On all government levels, including local, state and federal, KODAK Scanners, Software and Services are utilized to meet shared workspace needs as well as records management requirements. The FOSE Conference and Exposition provides a forum between the public and private sector to introduce digital solutions to the government market as well as the international and commercial technology communities.

“Kodak offers a wide range of digital scanning solutions and services that not only meet the needs of our customers, but also achieve greater cost-savings and productivity gains,” said Rick Churchville, Government Business Development Manager, Kodak's Document Imaging Group. “Within its compact size, the KODAK i2800 offers government agencies numerous efficiency and collaboration benefits. Kodak is honored by the Best of FOSE recognition and will continue developing products that suit the unique needs of government agencies and offices.”

From desktop to high-volume production, Kodak offers a broad portfolio of document scanning solutions which foster better practices for government employees to organize and monitor content. This year at FOSE booths #1401 and #1402, Kodak's Document Imaging exhibited a range of professional scanning solutions including the KODAK i2800 Scanner, the KODAK i5600 Scanner, the KODAK i4600 Scanner, the KODAK Scan Station Pro 550 and KODAK Capture Pro Software. EDAC Systems, Inc., a participating reseller in the KODAK Authorized Imaging Reseller Program, also exhibited side-by-side with Kodak at booths #1401 (Kodak) and #1402 (EDAC Systems, Inc.).

The award-winning, KODAK i2800 Scanner, one of three new KODAK i2000 Series Scanners introduced this year, is a compact device offering reliable performance, fast internal processes, and versatile document scanning capabilities, including double-sided materials. While small enough to work as a desktop scanner, high speeds of up to 70 pages per minute (ppm) enable smaller organizations to use the i2800 scanner as a departmental scanner.

Other recently introduced models within the i2000 Series Scanners include the KODAK i2400 Scanner and KODAK i2600 Scanner. The series includes a number of viable features that enable greater ease of use and more consistent image quality. KODAK Smart Touch Scanning feature includes up to nine pre-defined scan-to operations, while KODAK Perfect Page Image Processing Technology helps users to maintain high quality scans, using image sharpening, streak filtering and image hole fill for high fidelity images.

The i2000 Series Scanners additionally serve as a cost-effective investment for government agencies. Bundled TWAIN and ISIS drivers, which are easily customizable, enable ease of third party software interoperability with Kodak's scanners, while the entire series is also backed by a three-year worry-free warranty.

For government users located across multiple offices, the i2800 scanner can help them achieve more at the point of capture by enabling images to be immediately sent to a central location for easy access—including email clients and SHAREPOINT (sites). Additionally, using a dual LED illumination camera system, the

i2800 provides exceptional image clarity, color stability and high-speed first scans, while yielding excellent OCR read rates for increasing accuracy of data extraction. The ergonomic design of the KODAK i2800 Scanner includes the use of an upright position and a built-in handle for easy portability.

The KODAK i5600 Scanner performs at 170 ppm and allows large volumes of documents to be processed with optimized memory allocation, customized capabilities for job streams, and programmable function keys to improve processing times. The KODAK i5000 Series Scanners enables users to process and manage more data per dollar—up to 33 percent more accurately than select competitors, even with all imaging features enabled.

Kodak's 2011 booth at FOSE also highlighted:

- The KODAK i4600 Scanner. The i4000 Series Scanners are powerful, workhorse scanners that offer a c-shape transport with additional straight-through paper path, 500-sheet feeders and A3/A4 optional flatbed for additional application flexibility.
- The KODAK Scan Station Pro 550, Kodak's one-touch networked scanner designed to automate data and transaction capture in order to feed into external business processes.
- KODAK Capture Pro Software, helps users quickly convert forms, invoices and other critical business documents to high-quality images while providing enhanced integration with Microsoft SharePoint and other ECM systems. KODAK Capture Pro Software is available for standalone workstation configurations or networked enterprise installations.

Kodak is a global advisor and provider of integrated services to help companies transform and optimize their businesses. Through a network of service professionals in 120+ countries, Kodak provides technical, professional, consulting and managed services to enable customers to focus on growing their businesses, maximize productivity, and more effectively manage risks. All KODAK products and software are backed by KODAK Service and Support. To learn more, visit <http://graphics.kodak.com/>

About Kodak

Kodak's Document Imaging business enables customers to capture and use valuable information from electronic and paper documents. Our document imaging solutions include award-winning scanners and capture software, and industry-leading service and support. From small offices to global operations, Kodak has the right solution to feed your business the information it needs.
