

Kodak Alaris Wins Buyers Lab Innovation Award for Web-Based Information Capture Solution

ROCHESTER, N.Y., November 29, 2017—Keypoint Intelligence- Buyers Lab (BLI) has recognized Kodak Alaris with an Outstanding Achievement in Innovation award for Alaris Info Input Express software (both Limited Edition and Network Edition). Info Input Express is an intuitive web-based solution that simplifies information capture via mobile devices, multifunction printers and dedicated scanners. Documents and extracted data can be routed to desktops or business systems with significantly less human error.

Businesses are abandoning slow and costly paper-based processes in favor of cloud-based, digital alternatives such as ECM systems, business process automation solutions and line-of-business applications. To get the most out of these digital investments, organizations need capture solutions that can quickly and accurately extract and organize information.

“Alaris Info Input Express delivers a streamlined, easy-to-use interface, but don’t mistake that for a lack of power,” said Jamie Bsales, Director of Solutions Analysis for Keypoint Intelligence. “The utility combines a host of intelligent capabilities. For instance, the Intelligent Job Select feature enables users to insert patch code separator sheets into a batch to automatically change settings or profiles in the middle of a job, so they don’t have to stop to change them manually. Furthermore, users can search the Catalog to find and retrieve documents by entering metadata or full-text search criteria.”

BLI listed several additional benefits that users can expect, including:

- One-touch job buttons and automated indexing and routing to streamline business processes and reduce mistakes;
- Optical Character Recognition (OCR), barcodes, and patch codes for more efficient document processing;
- Full text and metadata search capabilities, plus document linking and activity filtering;
- Integration with leading cloud-services, plus an optional mobile app that lets users capture on the go;
- Easy deployment, use and support.

“Alaris Info Input Express enables users to access information anywhere – at the office or remotely,” said Siddhartha Bhattacharya, Vice President, Global Marketing, Kodak Alaris Information Management. “It can be used in a wide range of industries and vertical markets such as healthcare, government, banking and insurance to improve customer experience, facilitate compliance and reduce risk. It’s easy to use, support and install. And it’s scalable, which means lower licensing, upgrade and training costs. We’re proud to be recognized by Buyers Lab and we remain committed to offering an integrated approach to information capture, driven by the best scanners and software, delivered by our global network of partners.”

Kodak Alaris has won more BLI Awards (26) than any other scanner manufacturer. The firm was recognized with the 2016 and 2017 Scanner Line of the Year awards from Buyers Lab, marking the first time a scanner vendor has won the award two consecutive years.

About Keypoint Intelligence - Buyers Lab

Keypoint Intelligence is a one-stop shop for the digital imaging industry. With our unparalleled tools and unmatched depth of knowledge, we cut through the noise of data to offer clients the unbiased insights and responsive tools they need in those mission-critical moments that define their products and empower their sales.

For over 50 years, Buyers Lab has been the global document imaging industry's resource for unbiased and reliable information, test data, and competitive selling tools. What started out as a consumer-based publication about office equipment has become an all-encompassing industry resource. Buyers Lab evolves in tandem with the ever-changing landscape of document imaging solutions, constantly updating our methods, expanding our offerings, and tracking cutting-edge developments.

About Buyers Lab Outstanding Achievement Awards

Buyers Lab Outstanding Achievement awards acknowledge products or capabilities that stand out for attributes such as innovation, usefulness, or value.

About the Information Management Division of Kodak Alaris

The ever-increasing flood of data, and how we manage it, is one of the greatest opportunities facing businesses and governments in the 21st century. Kodak Alaris works with organizations from small offices to global enterprises, bringing together the best science, technology and partnerships so its clients can stay ahead of the curve. From our award-winning range of scanners and software to the best global customer service and support, we're here to help businesses transform data into a powerful competitive advantage.
