# Why Choose Kodak?

Start with a legacy of document imaging innovation that Kodak brings to scanning reliability and productivity. We know that ease-of-use, reliability, performance and simple integration — backed by the industry's leading service and support organization — will reduce your overall costs while mitigating operational risks.

Over the years, we've migrated our high-volume scanner technology to mid-volume and desktop models. Today, we are the only scanner manufacturer delivering advantages like these to distributed and desktop scanner users:

- Feeder and separation modules
- Robust metal document transport
- Cameras with sealed dual lamps

And now, thanks to Smart Touch functionality, many functions are one-button easy.

- Send documents to nine “scan-to” destinations
- Send to file, e-mail, printers, fax printers and other locations in popular file formats including PDF, single-page PDF, searchable PDF, TIFF, BMP and JPEG
- Scan to a **Microsoft SharePoint** site
- Customize one-button shortcuts for personalized productivity
- Settings can be easily transferred to other **Kodak** Scanners with Smart Touch
- Print an index of any user's customized Smart Touch shortcuts

Available on i1200, i1300, i1400 Series Scanners and the **Kodak ScanMate** i1120 Scanner.

Plus, Kodak's proprietary imaging technology — known as Perfect Page and built into every **Kodak** Scanner — eliminates the need for additional image quality and processing software purchases. It's incredibly easy to get ideal scans at the push of a button.

And when it comes to service, **Kodak** Service & Support offers global reach combined with a personal touch. These professionals can provide a single point of contact for you for service on equipment from over 100 manufacturers, with expertise in document imaging, storage, micrographics, printing and other types of equipment. They also have the ideal service, maintenance and support agreements tailored to your specific needs.
