### Notes:

Performance numbers are based on Kofax SQA results when scanning with VRS Default settings. Unless otherwise indicated throughput tests were performed with the following configuration:

- For Desktop or Workgroup scanners: dual core processor
- For Low-, Mid- or High-Volume scanners: quad core processor
- 2 GB RAM
- 200 DPI
- Black & White
- Duplex (if available)
- Letter size
- Landscape & 90/270 Rotation (if available)
- Interface: Kofax Adrenaline 450, 650, 650i, USB, or Firewire

### Kofax Express Categories

**Certified:** The scanner is thoroughly tested with the Kofax Express feature set. Advanced features (multifeed, color drop out, and feeder speed), if available from the scanner, are available directly from the Kofax Express interface.

**Certified\*:** The scanner is tested with the Kofax Express feature set. Advanced features (multifeed, color drop out, and feeder speed), even if available from the scanner, are configured through the scanner driver instead of the Kofax Express interface.

**Compatible:** The scanner is not tested with Kofax Express, but it is certified with Kofax VirtualReScan (VRS). Advanced features (multifeed, color drop out, and feeder speed) are configured through the scanner driver instead of the Kofax Express interface.

1 The throughput for these scanners were obtained using the following configuration:

- Quad core processor with 2GB RAM
- 200 DPI
- Black & White
- Letter Size
- Landscape Orientation

2 HVRS = Hardware VRS. This requires the installation of a Kofax CGA board into the scanner.

3 These scanners require the download of additional software drivers (a.k.a., Component Installers) during the Kofax Express installation process. Select "I will configure my scanner later" when presented with this option, then download your scanner's drivers from: [http://www.kofax.com/support/Express/1.1/1.1\\_downloads.asp](http://www.kofax.com/support/Express/1.1/1.1_downloads.asp)

4 Revised license level. Follow this installation sequence:

- Install Kofax Express v1.1
- When prompted to select a scanner choose "I will configure my scanner later"
- If required, download and install additional software drivers (see note #3)
- Download and install VRS 4.5 from: [http://www.kofax.com/support/IP/VRS/4.5/4.5\\_downloads.asp](http://www.kofax.com/support/IP/VRS/4.5/4.5_downloads.asp)
- Configure scanner
