

# Document Scanners for Transportation and In-Truck Scanning

**plustek**

Your business depends on data; a lot of it is on paper. Plustek scanners enable drivers to scan transportation documents at their source, in the truck cab or anywhere a laptop or portable computer can be used.

Typical documents include:

- Delivery receipts
- Bills of lading
- Invoices
- Timesheets
- Receipts
- Logs
- Trip reports
- Mileage reports

Capturing critical documents quickly at their source reduces business cycle times and improves payment times. Proof of delivery information can be provided in minutes instead of days. Errors normally caused by manual data entry are reduced. Mailing costs can be eliminated.

## Plustek Mobile and Transportable Scanning Solutions

Plustek offers scanning solutions that enable both in truck-scanning and easily transportable scanners that can be used anywhere. Solutions are available for scanning standard business sized documents as well as space saving solutions for scanning smaller documents such as receipts, waybills etc.

Use the following table to help select the Plustek scanner that meets your scanning requirements:
