## Rimage Producer III Series Systems

*Announcing the NEW 6100 and 6100N Single Recorder Systems*

### I. Overview

The Rimage Producer III series of digital publishing systems are the industry's highest-performing, most reliable solutions for automatically creating professional CDs, DVDs, and BDs with customized digital content and direct-to-disc print technology.

The Producer III 6100 and 6100N systems are the latest member of this product family, providing a single recorder system, with a small footprint, capable of publishing up to 8 full DVD-R (4.35 GB) and 30 full CD-R (696 MB) per hour. The Producer III 6100 and 6100N will be available on October 1, 2008.

The 6100N is a networked disc publishing solution that is easy to use as a networked printer or copier. Simply connect the Ethernet cable into the back of the embedded computer and the 6100N is connected to the network. Users have full access to all Rimage Producer Software Suite features. The embedded control center also delivers improved throughput, as much as a 15% improvement in DVD performance over a non-embedded system.

The 6100 and 6100N, as with all Producer III systems, are available with all Rimage printers, including:

Everest 600 Thermal Retransfer Printer. Rimage's newest printer and the industry's only 600 dpi printer. Customers who value high resolution images, consistent print quality, and sharper, easier to read text will demand the Everest 600.

Everest III Thermal Retransfer Printer. Rimage's original retransfer printer delivers the high quality discs customers expect from a Rimage printer.

Customers with an existing installed base will request an Everest III printer to help ensure a consistent look to all their published discs. PrismPlus! Thermal Printer. The PrismPlus! printer provides the lowest cost per printed disc and the highest throughput available on the market today. Combined with the exclusive Rimage PerfectPrint feature, customers can print on preprinted discs for a professional look.

The Rimage Producer III systems are the highest performing, most reliable product available in the market today. These digital publishing solutions are an important part of any digital publishing workflow and help customers build strong brand awareness, while supporting their business models.

## II. Producer III Standard Features

All Producer III systems (6100, 7100, 8100) have a common set of features that meet a wide range of customer requirements:

- Front-swappable recorders
- Available with CD/DVD recorders, BD recorders, or combinations of both
- Everest 600, Everest III, and PrismPlus! printer support
- Media Input/Output: Rotating four-bin carousel holds up to 300 discs and configurable for input or output.
- Blu-ray disc recording available on 6100N, 7100N, 8100N only

## III. Additional 6100 Specifications

Unlike the 7100 and 8100, which include a non-embedded control center, the 6100 is sold without a control center. It is important that when customers use their own external PC or dedicated computer, that the following requirements are met:

Processor: Core 2 Duo, E4300

RAM/Memory: 1 GB, DDR2-533

Fixed Storage: Two 250 GB, 7,200 RPM Enterprise Class Serial ATA hard drives configured in RAID 0:

- Drive one is used to house the operating system
- Drive two is used for the Rimage System Folder

Graphics: 1024 x 768 screen resolution, 32-bit color

Ports: One USB 2.0 port
