Kodak
Capture Pro Software

Simplify scanning.
Automate indexing.
Maximize connectivity.

Make your paper powerful!

Paper. It's not going away. You have forms, documents, records and much more. Simply put, **Kodak** Capture Pro Software makes your paper productive by streamlining the process of transforming paper into information.

Quickly convert batches of paper into high-quality images. Capture and index critical data and deliver it to databases, applications and people automatically. Send smarter information to ECM systems and **Microsoft SharePoint** with extensive integration to streamline workflow and processes. From desktop to high-volume operations, Capture Pro Software scales beautifully according to your needs.

Simplify. Automate. Maximize.

See how Capture Pro Software solves real-world problems

Simplify scanning

Start a scan job with one click
Click a job button to automatically scan, process and output. Create multiple job buttons to handle every common set up.

Optimize image quality automatically
Intelligent Quality Control automatically flags questionable images and optimizes image quality without rescanning. Auto orients, crops, and deskews images.

One capture solution that grows with your needs
Scalable for any environment, featuring one familiar interface for all scanners.

Save time with one-scan/ dual-stream output
Scan once and get color/bitonal, or grayscale/bitonal images. Enhance OCR from B&W images while retaining color images for archiving.

Automate indexing

Protect your data integrity with double data entry indexing
And guard against entry errors.

Index faster with drag-and-drop OCR
And speed operations with zonal OCR/MICR, 1D and 2D barcodes, and indexing for up to 999 fields.

Process surveys and other checkmark forms
Flexible mark detection accurately detects marks in specified zones and populates corresponding index fields with results.

Maximize connectivity

**Speed interaction with ECM systems and SharePoint**
Comprehensive integration and complete connectivity with multiple ECM solutions, **SharePoint**, and secure FTP. Standard interface, ability to import **SharePoint** index configurations directly into Capture Pro Software, multiple column types, and more.
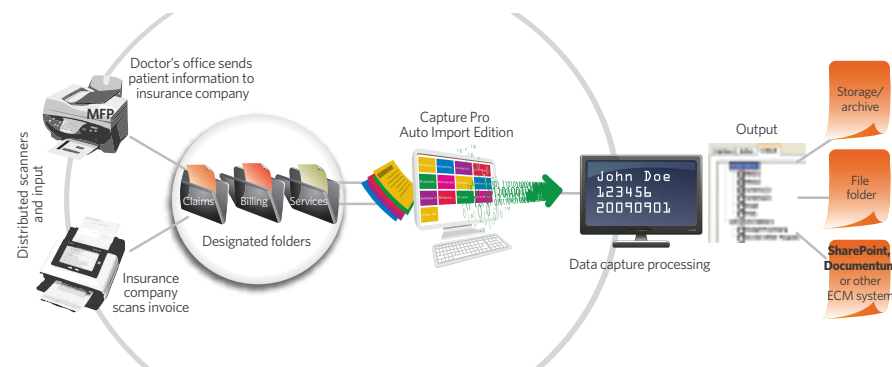

Select output for **SharePoint**.

Choose **SharePoint** destination.

Create index fields from **SharePoint** columns.

Automatically import document images from your network
No need to scan – continuously import and process document images.

Doctor's office sends patient information to insurance company

Improve output accuracy and productivity
Send batch statistics to databases.

Boost indexing speed and accuracy
Streamlined database lookup also assures captured index fields are correct.

PDF options for any need
Searchable PDF, encrypted/ protected PDF, PDF-A, compressed color PDF, PDF bookmarks, fast Web view and others.

Kodak Capture Pro Software is a versatile application successfully used in many industries and market segments, in both centralized and distributed scanning environments.

County social services department smoothly captures and indexes data from central and distributed locations

A county in Nevada now aggregates documents and key data from multiple, far-flung locations via **Kodak** Scanners and Capture Pro Software. With auto import and indexing via barcodes, caseworkers can now access records via case number, name, ID and other key search criteria.

Results: *Faster access to information and case processing, better client service, reduced risk of fraud, and rollout of system to 27 other county departments, thanks to results from social services solution.*

European financial services firm centralizes job setup, license distribution, and software installation with Network Edition

Job parameters are now easily set up, changed and synchronized on scanners throughout the organization. Licenses and installation are also now centrally administered.

Results: *One-step management of all scanning stations, full optimization of license purchases, and dramatic reduction of time spent on driver and software installations.*

Healthcare organization slashes manual entry, enhances accuracy with barcode recognition

Pre-printed patient barcodes, affixed to each record, eliminated manual document indexing for a healthcare provider offering home care services. Pertinent data – including patient name, ID, time and reason for visit and more – is now autofilled in forms.

Results: *Significantly lower costs and error rates, smarter resource allocation, and enhanced patient care.*

Service Bureau cuts data entry time by 50% with Capture Pro Software's database lookup feature

A Maryland-based service bureau scans document barcodes, then pulls names, dates of birth and other key data to auto-populate all relevant index fields in patient records for an area hospital system. For another healthcare facility, barcodes are not available, so the service bureau uses the drag-and-drop OCR feature on specific data to initiate database lookup.

Results: *Greatly reduced data entry time (50% less) and enhanced accuracy through elimination of requirement to manually key in data twice.*

# Expand the power of your Capture Pro Software Solution

Capture across your world – Capture Pro Software Network Edition

- Centrally manage multiple capture and indexing stations anywhere on your network
- Remote administration and batch monitoring
- Utilize auto import, link workstations and more

Got files?
Import them – Capture Pro Software Auto Import Edition

- Import image files from MFPs and other sources via network folders
- Benefit from the same imaging, indexing and output capabilities you get with scanned images
- Can run as a service; no operator needed

Be productive right out of the box – Capture Pro Software Limited Edition

- Make your paper powerful immediately with software supplied with many **Kodak** Scanners
- Easy single-batch scanning productivity; upgrading to the full Capture Pro Software version is a snap
- 16 GUI languages; 126 OCR languages supported; native **SharePoint** connectivity

Productivity. Assured.

Only we and our authorized partners offer essential and advanced services that ensure the optimal integration of **Kodak** Capture Pro Software into your business processes, as well as the ongoing assurance of productivity throughout the life of your investment.

With Startup Assistance, your team can be productive immediately. With Software Assurance, your team can remain productive using the latest technology via software updates, version upgrades, and access to exclusive support resources.

Kodak Alaris' Document Imaging solutions enable customers to capture and consolidate data from digital and paper sources, automatically understand and extract valuable insight from the contents, and deliver the right information to the right people at the right time. Our offerings include award-winning scanners, capture and information management software, an expanding range of professional services and industry-leading service and support. From small offices to global operations, Kodak Alaris delivers systems and solutions that automate business processes, enhance customer interactions and enable better business decisions.
