Flexible distributed capture made simple

Built-in Wi-Fi, Ethernet, and USB connections give you the freedom to locate your scanner in the most convenient, ergonomic place.
Put your scanner anywhere with **PaperStream IP Net**

Optimize your office space and place the scanner wherever needed, without the limitation of USB cable. We’ve added both Wi-Fi and Ethernet connectivity to our popular fi-7160 workgroup scanning platform, so the scanner can now be positioned to improve worker productivity and reduce interruptions.

Standard TWAIN and ISIS software packages work seamlessly. With new PaperStream IP Net, you have all the powerful cleanup and seamless application connectivity of the PaperStream IP driver over the network. Installation is simple: just select the IP address of the scanner to tie it to your standard data-source. Your software will work the same with no changes! No training needed.

**PaperStream Capture** integration enables push scanning. Your capture profiles will show up on the scanner’s 4.3” color touchscreen. Just drop documents in, press the job button, and PaperStream Capture will scan and save all of your documents to your pre-configured destination.
