ml:Deal

Check capture without limitations

The practical, smart, and secure single feed check scanner for cost effective and reliable low-volume capture in a wide range of application options, from the world's most trusted brand.

Practical. Smart. Secure.

The ml:Deal offers exceptional, state-of-the-art flexibility for deployment, integrating with minimal effort with a wide variety of physical and virtual environments through wired or wireless connectivity. Combining innovation with **API-free and driverless** usability with RDC, branch, POS and mobility applications, the ml:Deal offers the most reliable and economical capture of checks while ensuring compliance with the main truncation regulations worldwide.

Checks are fed face-up and automatically right-aligned to ensure accurate magnetic reading and an exceptional ease-of-use.

- Usable for **RDC** with no need to download APIs or drivers
- Usable in **Branch of the Future** or **mobility** applications
- Adds professional check capture to the **POS**
- Wired or **wireless** connectivity

Countless benefits **at your fingertips**

The horizontal-feed **experience of a self-service device right on your desktop**: get the job done from your own office, avoiding annoying trips to the branch or ATM. Capture the advantages of the ground-breaking form factor while speaking to the application in the **language of the web** – with no need to download and manage your peripheral's APIs and drivers over time.

"The results have reduced the number of customer support calls and frustration improving customer service satisfaction. Wi-Fi and Mac client support have great appeal, and key to the overall decision to continue expanding the relationship with Panini. Overall, Panini technology and architecture is a great solution for us".
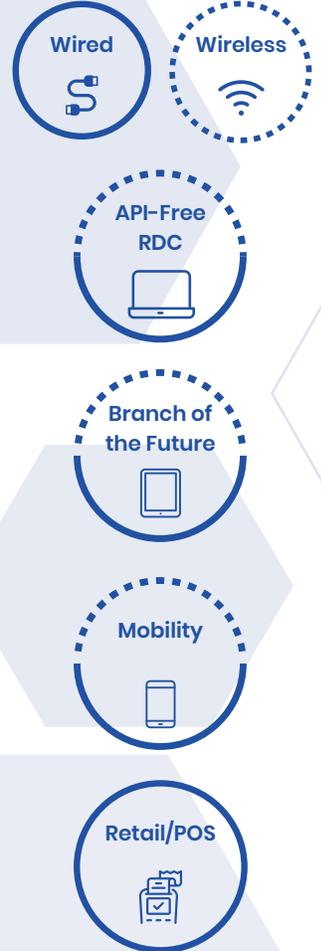

A high volume RDC Customer

PANINI®

Details that make it truly unique

Clever, compact form factor. "Clamshell" design for cleaning and easy removal of any foreign items.
