

Smarter scanning productivity starts here!

Streamlined image processing, automatically

Some scanners require you to purchase and install software to process images post-scan to access features like deskew, rotate, crop, delete blank pages, save as PDF, etc. You're paying more, and you're adding steps and time to your scanning process. With Kodak, our scanners come equipped with the right software and tools you need to make scanning easy, high quality and complete. **Kodak** Scanners deliver the ultimate in simplicity and functionality.

Perfect Page Scanning

Perfect Page is the foundation of all **Kodak** iSeries Scanners. It's automatically installed with your scanner software. Perfect Page enables easy setup and configuration of all image processing settings, so you can output exceptional images, even from the most difficult and challenging documents.

VirtualReScan Software from Kofax (VRS)

When your application requires **VirtualReScan (VRS)** Software technology, selected **Kodak** Scanners come with **VRS** (or it's integrated into the hardware of the scanner). This means you get image enhancement features and error resolution tools — including more precise image cropping and advanced color management — to improve image quality on documents scanned in color, without sacrificing speed.

Smart Touch Functionality

With the touch of a button you can scan and file documents, send e-mails or start up other applications for your documents. With up to nine different settings, you can organize your documents by type or destination. Simplify complex tasks and make them "one-button easy." Create PDFs, **Microsoft Word** Documents, TIFF or JPEG images. ALL this powerful software is built right into the scanner.

Kodak Capture Desktop Software

Kodak Capture Desktop Software is an intuitive and easy-to-use capture software application, specifically designed to make processing and sharing scanned documents simple. With **Kodak** Capture Desktop Software, you'll benefit from "out of the box" productivity and have the immediate ability to capture, edit and output anything from single documents to larger batches in distributed or departmental environments.

Kodak Capture Pro Software

It's like an extreme makeover for your document capture and management. Quickly convert forms, invoices, records and other critical business documents to high-quality images. Efficiently capture critical index data, then automatically deliver it to all databases and applications. The latest version features advances in quality control to identify and adjust challenging images without rescanning, enhanced integration with **Microsoft SharePoint**, and other valuable additions. Save training costs with one familiar interface for all your scanners (from Kodak and other vendors). Cut costs for manual data entry during indexing with Database Lookup to validate or populate fields from Open Database Connectivity (ODBC) sources. Leverage your existing ECM systems and databases through easy integration. For even greater flexibility, there are Capture Pro Software Network and Capture Pro Software Auto Import Editions.

World-class Kodak Service & Support

Protect your investments, assure ongoing productivity and gain peace-of-mind with world-class service from **Kodak**. It's an unparalleled array of end-to-end solutions to let you more effectively manage and maintain your equipment and business processes. Our expertise extends well beyond the **Kodak** Document Scanners portfolio to provide service and support for scanners and document imaging technologies offered by numerous other manufacturers.
