PRODUCT HIGHLIGHTS:

- **Massive ADF & High Output:** 750-sheet feeder breaks big tasks into fewer batches and saves prep time.
- **Automatic Skew Correction:** Identify skew and straighten feeding documents for improved throughput.
- **Versatile Design:** U-turn and Straight Scan feed options can handle a wide variety of paper sizes and thicknesses without hassle.
- **Precise Imaging:** Clear Image Capture (CIC) proprietary technology gives crisp detail and accurate color performance.
- **Highest-volume digitization:** Perfect for large-scale capture of documents in high-volume paper collection areas and continuous paper processing. Capture documents quickly and easily, regardless of document types and thickness.
- **Document & data protection:** Innovative paper-handling technologies and Clear Image Capture (CIC) ensure complete, accurate digitized documents while protecting the originals from damage.
- **Durable & user friendly:** Built for the long haul with design enhancements that make operation and maintenance easier than ever. And LED lighting showcases the high build-quality and metal components.
